

Frontier Pro Services offers experts with over 25 years of experience in operating and maintaining wind turbines. Our mobile technicians provide reliable, quality, on-demand services throughout the United States and Canada. Our technicians have a working knowledge of mechanics, hydraulics, controllers and composites. They have the ability and training to safely climb and service your turbine in all kinds of weather.

Frontier Pro Services is led by an executive team of wind industry pioneers, with a depth of experience extending from the earliest days of the wind industry in California.

Frontier Pro Services saves you time and money.

End of Warranty Inspection

WHY FRONTIER PRO?

We offer EoW services to identify warranty risks before you inherit them.

- As turbines come out of warranty, maintenance and repairs are becoming bigger issues than ever before. Project owners will have to shoulder unscheduled maintenance and repair costs, which can adversely affect profitability.

INSPECTION SERVICES
